

G2 Crowd Recognizes Dynatrace as a Leader in Application Performance Monitoring Software

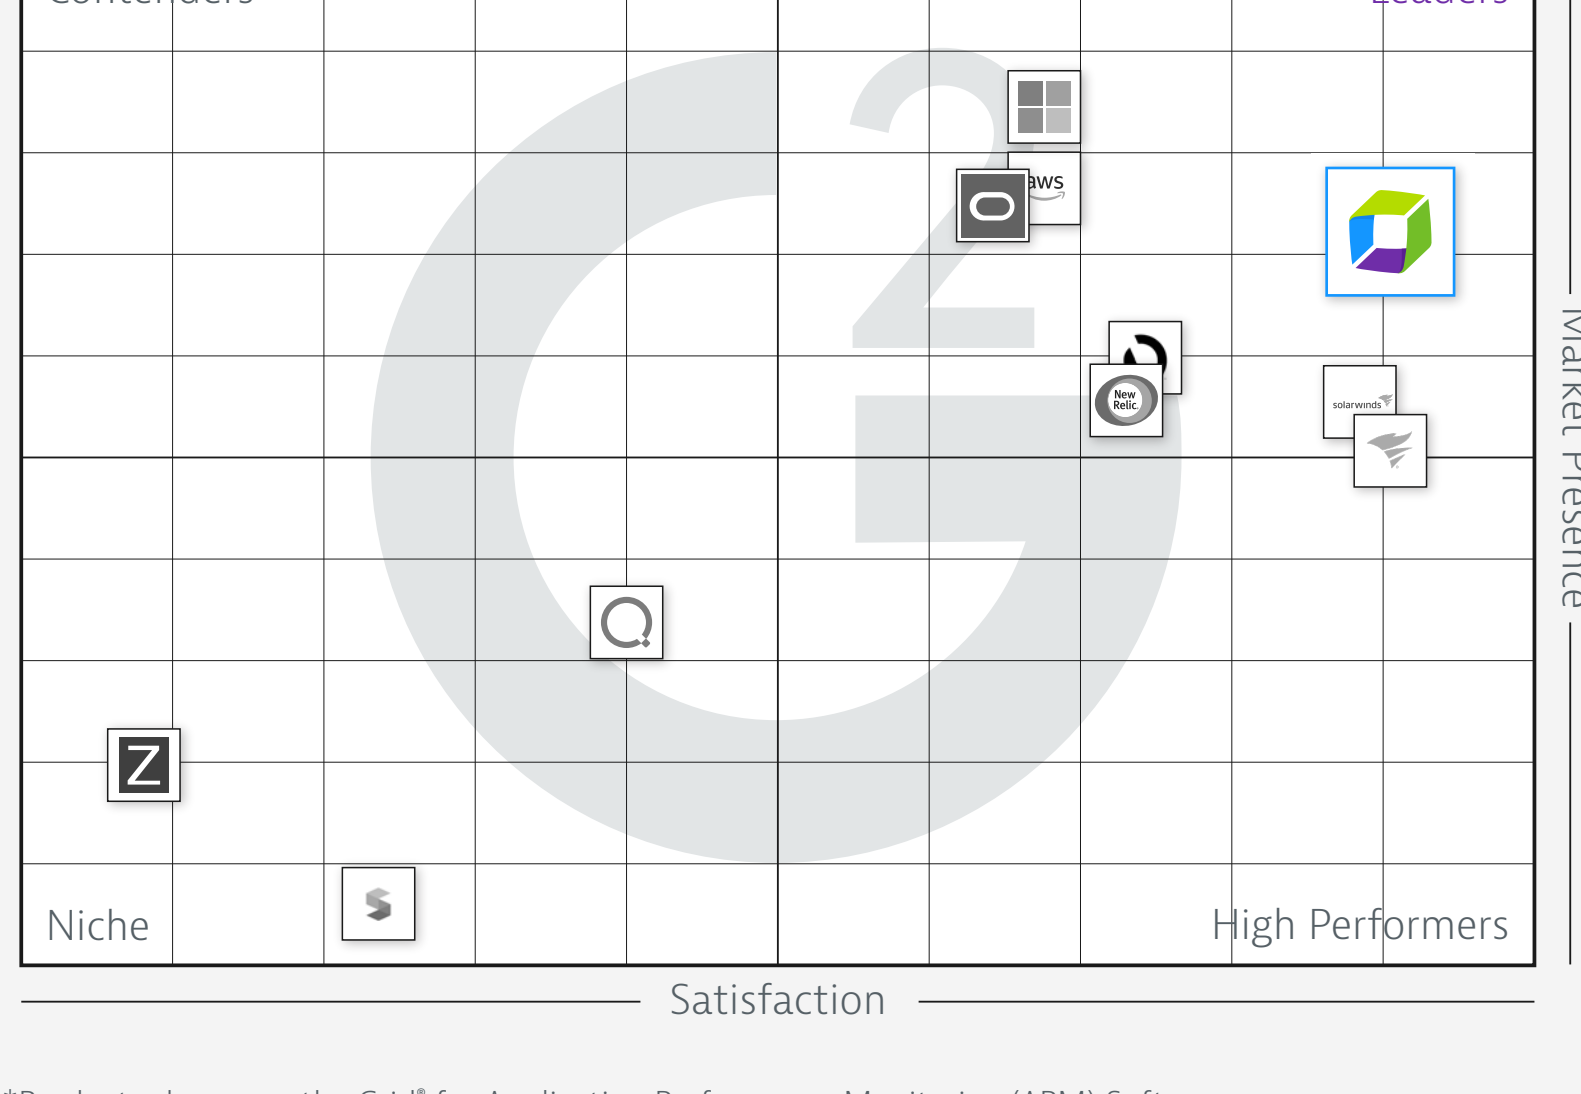

Dynatrace is the leader in Software Intelligence, purpose built for the enterprise cloud. It's the only AI-assisted, full stack and completely automated intelligence platform that provides deep insight (answers, not data) into dynamic, web-scale, hybrid cloud ecosystems.

That's why the world's leading brands, including 72 of the Fortune 100, trust Dynatrace to optimise enterprise cloud operations, release better software faster, and deliver perfect user experiences.

APM Software

Products shown on the Grid for Application Performance Monitoring (APM) Software have received a minimum of 10 reviews/ratings in data gathered by May 31, 2018.

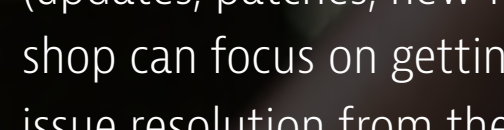

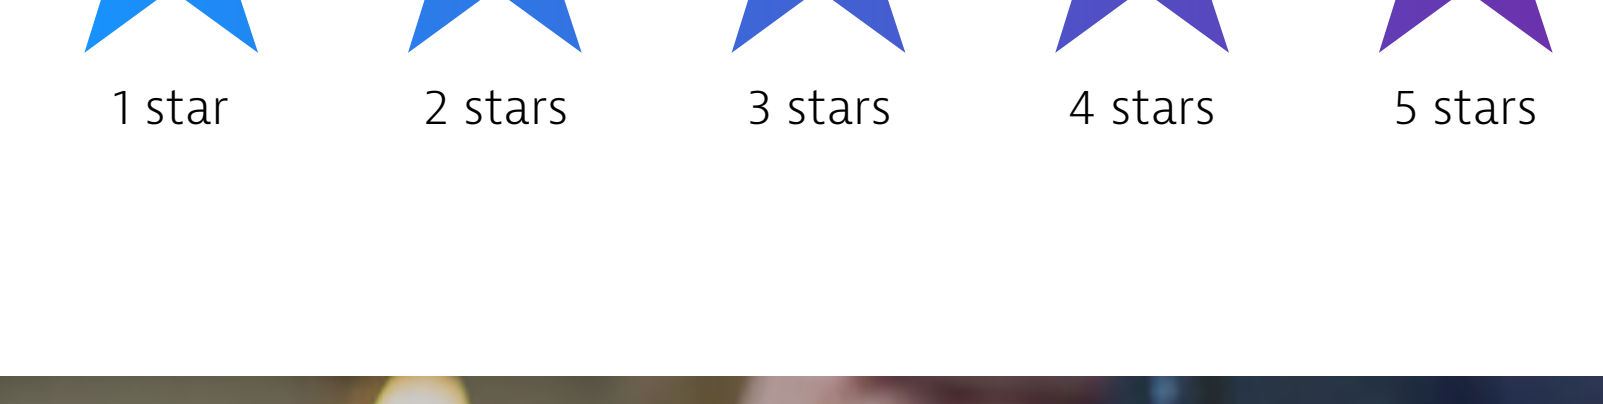

Dynatrace not only tells you your users are having issues with your application, but also where you should look to fix the issue. In modern complex applications, it is no longer enough to just hope for the best. The latest product utilizes AI, and massive automation makes it really easy to deploy.

Review Star Breakdown

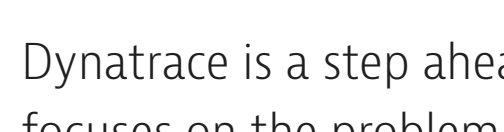

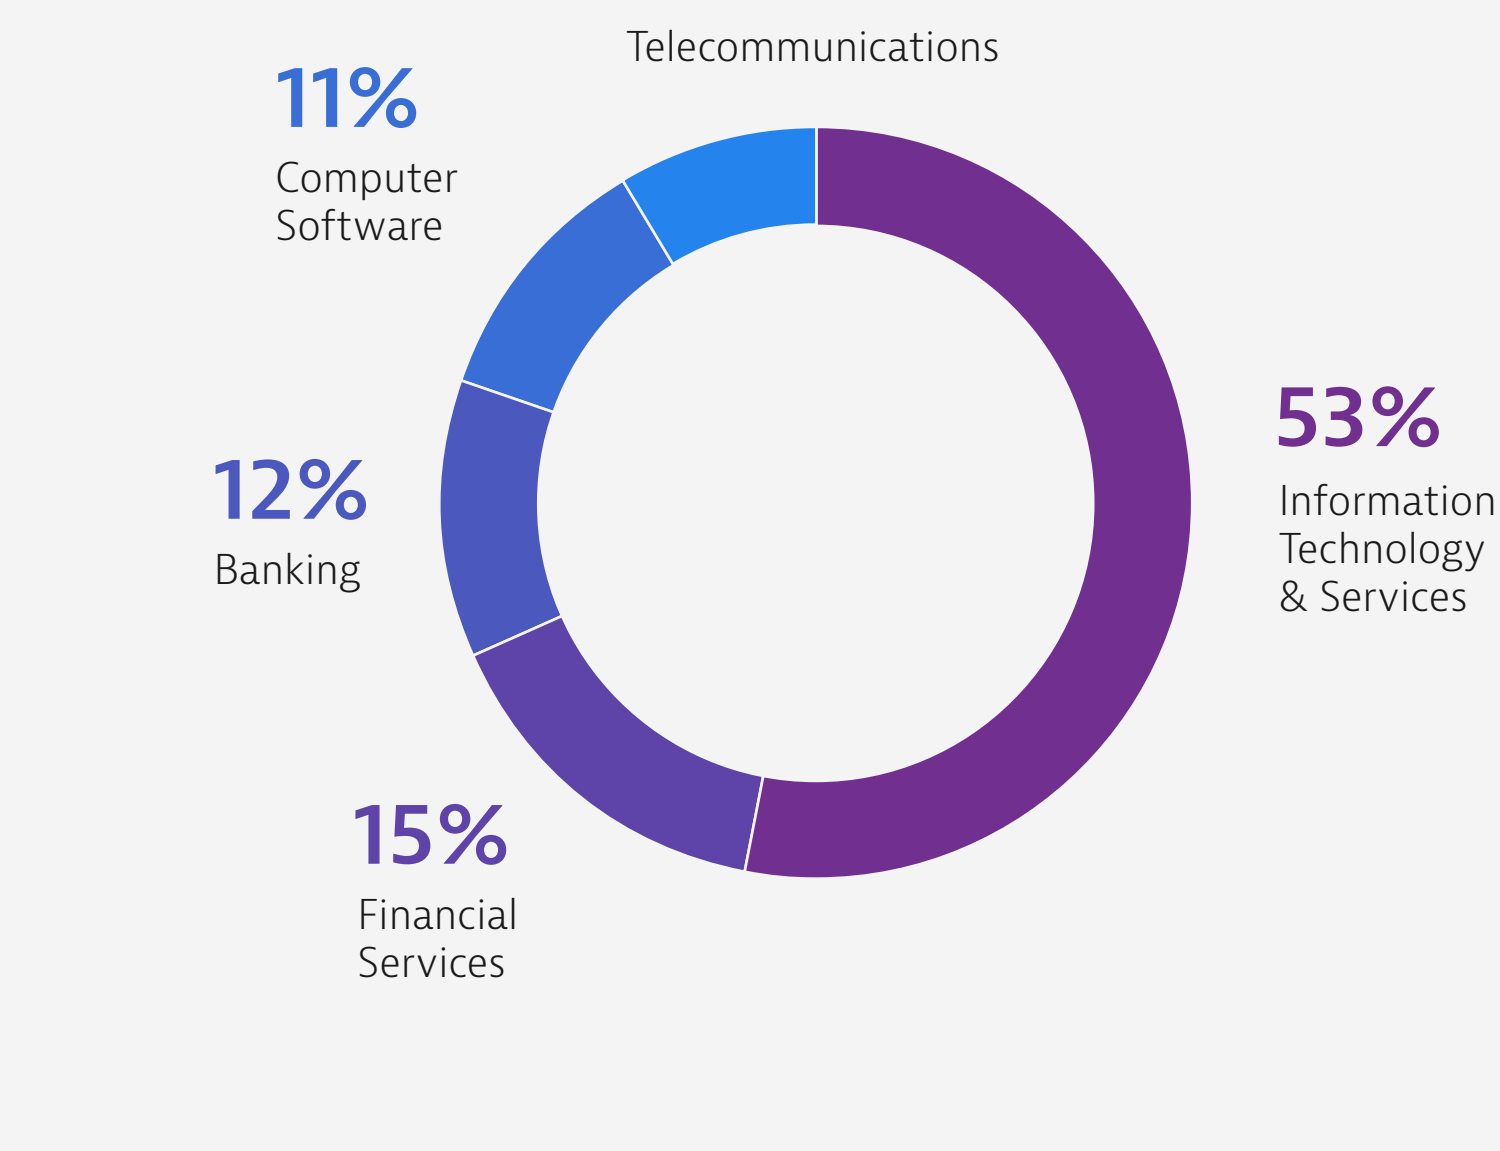

93% 4 or 5 stars

With the SaaS version of Dynatrace, all the admin functions are taken care of by the Dynatrace team (updates, patches, new features, bugs, etc.) and our small shop can focus on getting valuable metrics, alerts and issue resolution from the product. That is very important because, despite how many features and how powerful a product is, it will only return value to an organization if it is being integrated and used regularly for its intended purpose; Dynatrace makes that easy for us.

Automotive Industry

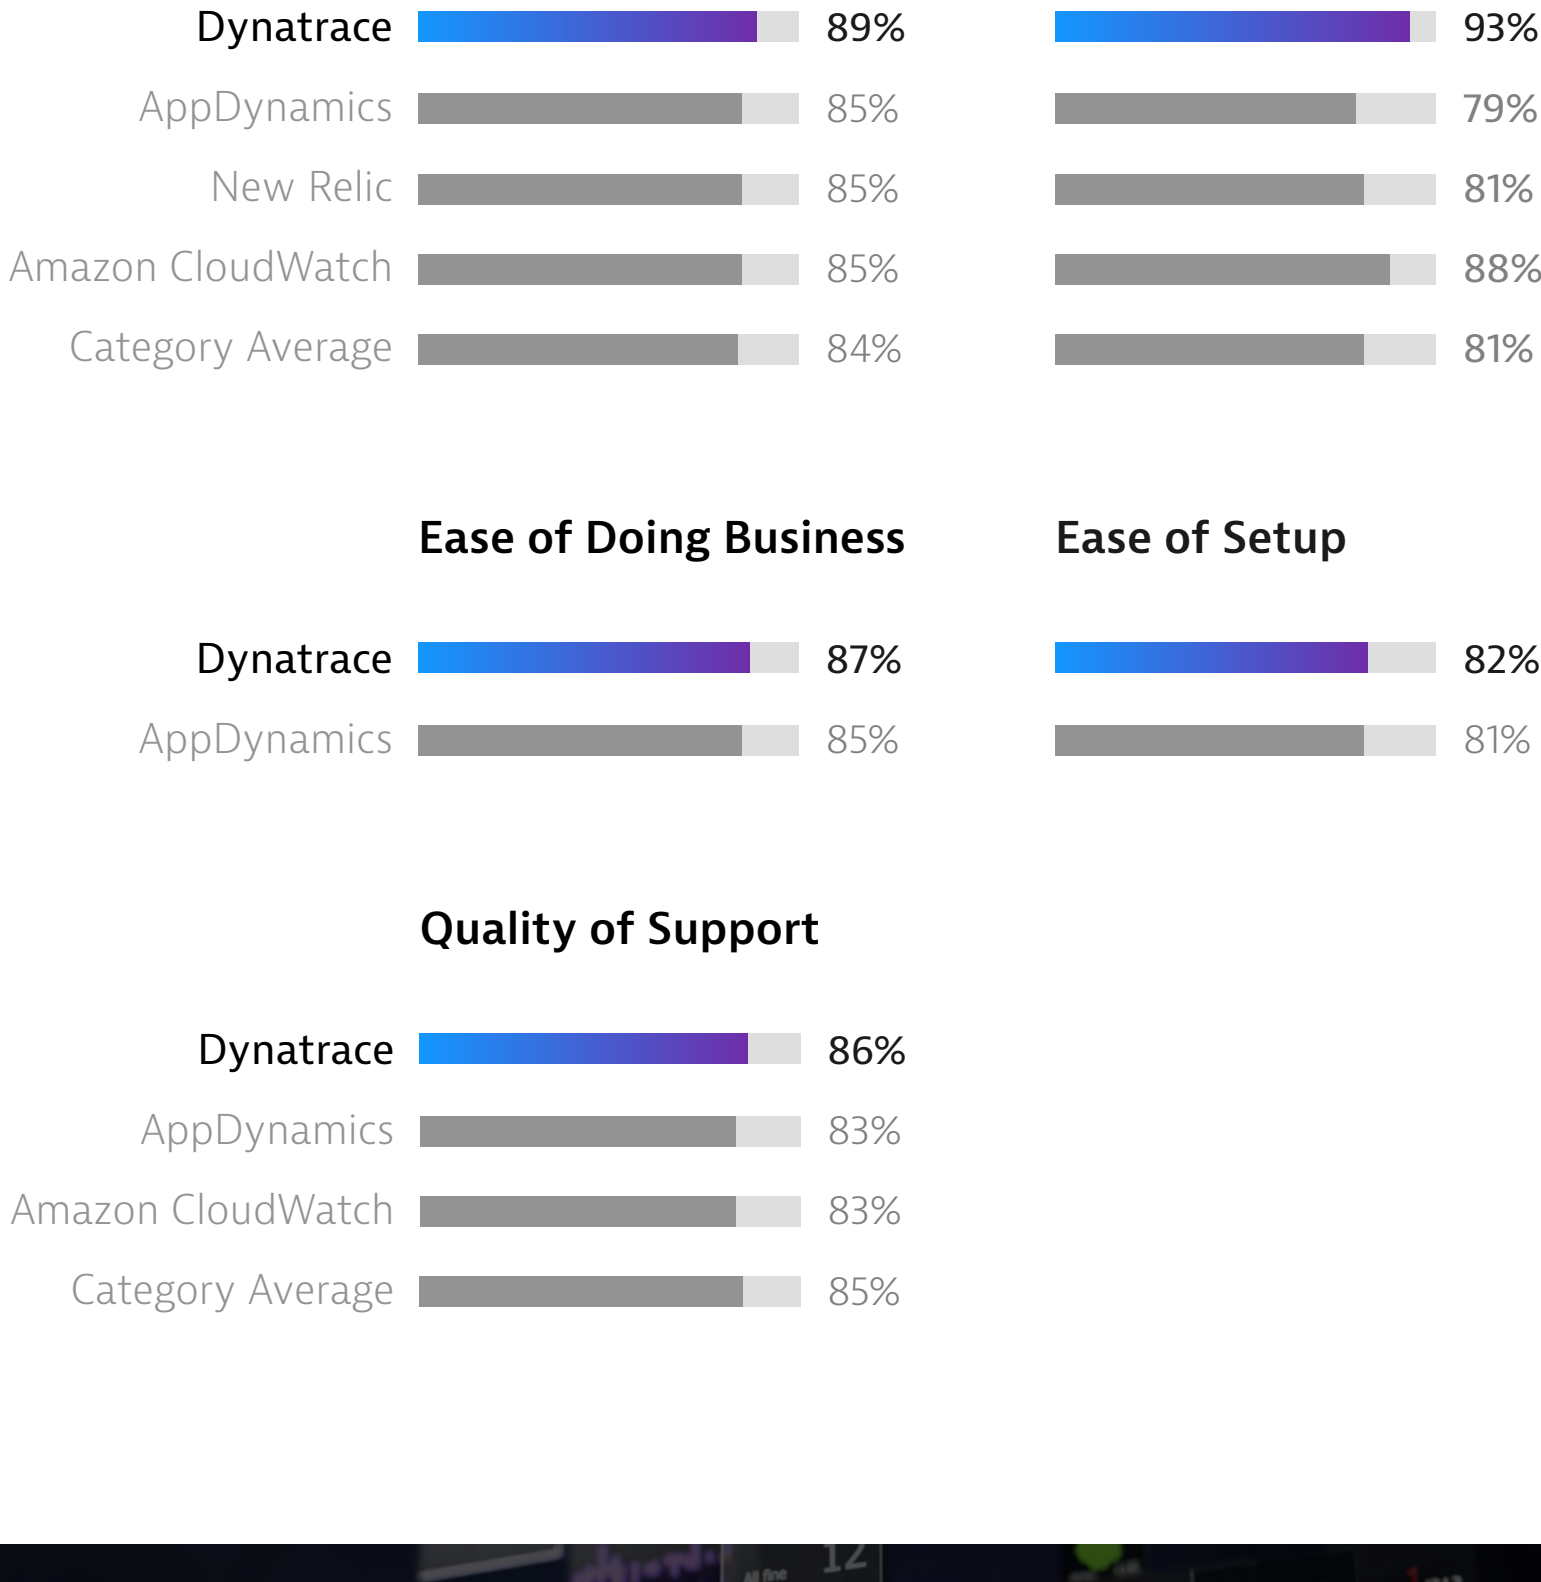

Industries Served

Dynatrace is a step ahead from other tools, wherein it focuses on the problem identification rather than just alerting on the issue. It uses a holistic view of the monitored environment and suggests bottlenecks way beyond the capability of the other tools.
